

## Quiz # 4 — CS2340 Sp02

Name:

ACME account ID:

Write a method *rainfall*: that takes in an `OrderedCollection` of integers representing amounts of rainfall. When you see the number 9999, print to the Transcript the average of the *positive* integers that you saw. For example, if the input was the `OrderedCollection #(1 2 -3 4 9999 5)`, you would print the average 2.3  $((1 + 2 + 4)/3)$ .
